Information about new registration procedure for dentists trained outside the EEA

The Danish Health and Medicines Authority has composed a new registration procedure for dentists which have become effective as from 1 March 2011.

The new registration procedure will among other things include tests designed for the candidate to demonstrate his/her necessary skills and knowledge to communicate in Danish and to practice dentistry. The dentist must pass these tests before he/she can take up employment as a dentist in Denmark.

The procedure will apply to dentists who have handed in an application and as of 1 March 2011 have not received a decision and to dentists who have applied for a temporary authorization to be used in connection with employment as a dentist that will take place on or after 1 March 2011. In short, this means that according to the new procedures, dentists will not be able to work as such until after the above mentioned tests have been passed.

[Further information of the new registration procedure](#)

Please be informed that in connection with the administration of an application, all information including personal data is processed electronically by the Danish Health and Medicines Authority. Pursuant to the Personal Data Act (persondataloven), all parties involved - with some exceptions - have e.g. a right to access to the information that is processed. For further information see www.datatilsynet.dk.

The Avicenna Directory for medicine includes the latest information from the new survey in progress of all the world's medical schools, as well as information from the 7th edition (2000) of the WHO World Directory of Medical Schools, with updates submitted to the WHO Directory between 2000 and 2007. Each entry is marked to show if the information is new, or is from before 2007:
